Suggested Specifications

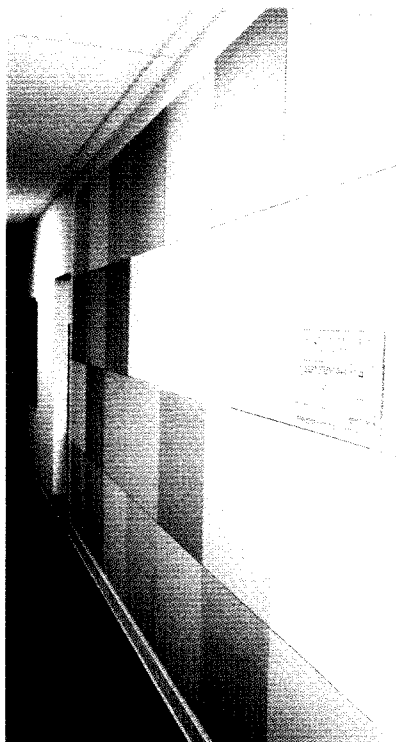

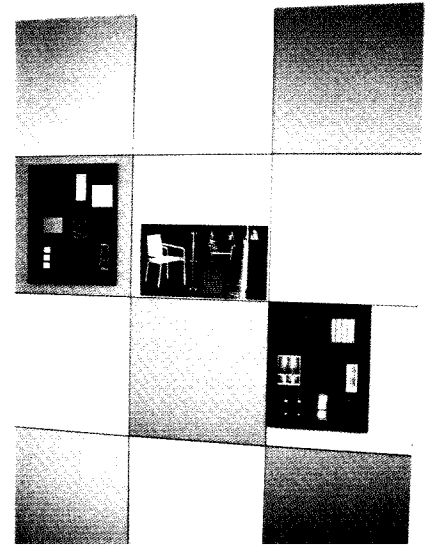

These suggested specifications are general in nature. It is expected that they will be altered by the Architect to suit the needs of each individual installation.

Scope of Work

The Contractor for this section of the work shall furnish and install Just-A-Wall® magnetic surface wall system, design # _____ (fill in design number from Architect plans), manufactured by Bollen International, Inc. 9218 Viscount Row, Dallas, Texas 75247
Phone: (214) 631-9300 Fax: (214) 631-9302 Customer Service: (800) 248-4808
bolleninternational.com

The Just-A-Wall® magnetic surface wall system shall include, but not be restricted to, 18 gauge steel panels coated with Crafton®/Crafton Plus® colors as indicated on plans.

USE CHROME BACKED MAGNETS ONLY.

Installation

Materials shall be installed in strict accordance with procedures recommended by the manufacturer and Architect's drawings. Primed wall to be marked off from center line with grid design as indicated on plans. Determine center of wall and layout grid lines of panels left and right, top and bottom of center point. Apply a smooth, even coat of water-based paint (color as selected by Architect) over all grid lines with a roller or brush.

Apply 4 strips of 1/8" thick double faced tape, to perimeter of back of panel. Tape is to hold panels in place while construction adhesive bonds and cures.

Reference

Construction adhesive such as Macco Adhesives Liquid Nails® for Steel and Metal Framing LN925 according to manufacturer's instructions is required for attachment of panels to drywall vertical applications.

Design shapes and colors of panels, as indicated on Architect's drawings, to be mounted to wall. All panels should be flush with adjacent panels. A consistent minimum 1/8" reveal should appear between all panels on all sides or according to Architect's drawings.

Upon completion of panel installation, a damp, wet cloth should be used to wipe down any dirt or residue. A water-based cleaner such as 409® can be used for stubborn, soiled areas according to directions.

Samples

The Contractor shall submit to the Architect, at the Architect's request, 4" x 4" metal production color samples showing materials and finishes to be furnished. Installation shall not proceed until Architect has approved such color samples.
